

Certified Privacy & EU GDPR Practitioner (CPEGP)

A Global Certification Course

Globally, data privacy gains momentum and failure of protecting data of private nature results in huge penalties and reputation loss. Governments have to protect the privacy of citizens' data and hence for those deliver products or services too.

An inevitable certification for those who want to understand and implement data privacy in general and EU GDPR in particular. This three days training course is focused on equipping delegates with the knowledge and skills to implement an effective privacy and information security compliance program under the GDPR or any other privacy law or regulation.

Get a comprehensive understanding of global privacy laws / regulations and the privacy program implementation steps.
